

Intelligent Solutions in Life Sciences

As the specialized needs of life sciences initiatives have grown, Browning Construction has responded with technically advanced solutions that meet demanding requirements. With extensive resources and some of the industry's foremost experts in biotechnology construction and development, Browning understands how to deliver the most value for your budget. Let our skilled life sciences team create a customized facility that maximizes your success.

"In our market, our clients determine whether our facilities, systems, processes and talent meet their requirements. We have had several client audits of our facility already - the results are conclusive that our facility meets and exceeds their expectations."

– Alisa Wright, Founder & CEO, BioConvergence

Experienced in a wide variety of buildings, facilities, labs and cleanrooms

Offer a unique insight from the perspective of owner, architect and contractor

Multi-disciplinary team brings a complete, well orchestrated solution to every project

Broad range of specialized functions in all areas of construction and development including LEED projects and accredited professions

Customized Facilities for Precise Requirements

80,000 sq. ft. biotechnology research facility hosting laboratories and executive offices.

130,000 sq. ft. corporate headquarters with additional 14,000 sq. ft. of biotechnology laboratory space.

70,000 sq. ft. facility for pharmaceutical product development and temperature controlled storage.

26,000 sq. ft. of office, cleanroom and research & development support for medical device manufacturing.

25,000 sq. ft. medical office building supporting a large group of radiologists for imaging services.

100,000 sq. ft. full-service healthcare facility providing multiple levels of patient care and service.

"Browning went above and beyond to insure that the relocation of our office, warehouse and production facility went as smoothly as possible in their role as both contractor and landlord."

- Jim Pearson, President & CEO, Suros/Hologic

Strength to make it happen. Resources to do it right.
